

The 25th of January was a busy day for the BIBB, and an even busier day for the 8 PCFs and the 2 WPBs we tended. Patching up men and boats, refueling, rearming and a MEDEVAC, kept us going all day long. The "Swifties" have an important but dangerous job to do in the Mekong Delta. They probe deep into the many canals and rivers and are almost certain to come under enemy fire on each mission. We were proud to be a part of their support team.
