

goose bay, labrador

Argentina, Newfoundland, and Goose Bay, Labrador, were the first two liberty ports. Like most of the places that a military vessel can visit in the North Atlantic, these are both installations prefabricated somewhere and nailed together on the edge of the wilderness. Actually, Goose is better than the others. It has three clubs, a gym with a huge judo expert, and women if you're quick. In June it was warm enough to swim but apparent that the summer would be long and lonely.
