

engineering department

SOUTHWIND needs more than yeomen, seaman, cooks, and ET's to accomplish her missions. She needs priceless water, electricity, and heat; she needs damage and gyro control; but, most of all, she needs propulsion. All these vital and difficult projects are the responsibility of the Engineering Department, who work in grease, 130 degree temperatures, and oil, 24 hours a day for months on end to give the essentials that SOUTHWIND requires.
